

Reduction of bacterial load in carpet from using a Britex Deep Cleaner with Britex Carpet Cleaning solutions

Test description: Environmental Rinse
Testing Commenced: 30/11/2017

This testing was conducted at a NATA accredited independent laboratory.

Carpet sample	Aerobic plate count CFU/cm²
Control sample*	46,000
Sample after deep cleaning with Britex using Britex cleaning solutions	22
Sample after deep cleaning with Britex using Britex cleaning solutions	26
Average of cleaned samples	24

*This sample was taken from a section of carpet in a high traffic office area.

Deep cleaning a carpet sample taken from a high traffic office area, using a Britex deep cleaner and Britex carpet cleaning solutions, reduced the bacterial load from 46,000 CFU/cm² to 24 CFU/cm² (99.95%).
